A pillar drill is a free standing machine that uses a motor to rotate a drill bit at a variable speed range, used to cut holes of different diameters into a range of material types. Also referred to as a drill press machine, they have the ability to bore precise horizonal holes to offer far better drilling accuracy than a handheld tool.

One of my sons recently gave me a behemoth of a bench top drill press (Central Machinery model 726). It works great but did not come with a chuck key. The chuck is a RJ3-16H. I have looked online and it gave me several different sizes for that chuck number. Does anyone know what size key I need? Thanks
