This book is a comprehensive reference bringing gynaecologists and trainees up to date with the latest advances in their field. Divided into eight sections, the text begins with discussion on history taking and investigations. The following chapters provide a selection of clinical case studies detailing the diagnosis and management of different gynaecological disorders. Some cases are presented in question and answer format to assist understanding. The remaining sections of the book cover reproductive physiology, birth control, surgical instruments, specimens, and imaging. The chapters on instruments give particular focus to endoscopic surgery. The text concludes with research questions for students. Topics in the book correspond with those in practical and oral examinations and the text is further enhanced by clinical photographs, diagrams, radiological images and tables. Key points Comprehensive guide providing latest advances in diagnosis and management of gynaecological disorders Features clinical case studies, some presented in question and answer format for ease of understanding Includes research questions for students Highly illustrated with photographs, diagrams, radiological images and tables

Scattering, Natural Surfaces, and Fractals provides a comprehensive overview of electromagnetic scattering from natural surfaces, ranging from the classical to the more recent (fractal) approach. As remote sensing applications become increasingly important, this text provides readers with a solid background in interpretation, classification and thematization of microwave images. The "scattering problem is discussed in detail with emphasis on its application to electromagnetic wave propagation, remote sensing, radar detection, and electromagnetic diagnostics. Natural surface and fractals complete this treatise focusing on how the fractal model represents our natural environment and other planets in our solar system, most recently as used to research the planet Venus and Titan, one of the moons of Saturn. An example of how scattering, fractals, and natural surfaces are of great importance is the following: Natural oil slicks in the ocean have been found to be fractal while man-made ones (generated by illegal washing of oil carrying ships) are not. Processing of an ocean image from space may detect the latter by means of a fractal analysis. An elegant and clear treatment of a rigorous topic with informative prose and realistic illustrations of scattering Provides readers with a solid background in interpretation, classification, and thematization of microwave images The only book available on fractal models and their application to scattering

From the award-winning author of *The Boy Detective Fails*: A novel of two brothers growing up on the other side of the tracks. "A trailer park in the Plains town of Tenderloin is the setting of this crusty coming-of-age debut, which features some of the liveliest characters just this side of believable that one is apt to meet in a contemporary novel. The first-person narrator is a moral but susceptible eleven-year-old called Dough, who lusts after his fifth-grade teacher and idolizes his trouble-making older brother, Pill-Bug. The boys, who are new to the town and shamed by the stigma of living in a trailer, were named by a father who wanted them to remain tough and who ended up dying while smuggling cigarettes along a Texas highway. Their mother and her new boyfriend, French, are low-life swingers, allowing the siblings to spend nights with Val, who entertains a slew of men but whom Dough worships as a virginal Madonna. Dough's own adoring friend is Lottie, a slightly deranged girl who offers Dough a gift of one of her taxidermist father's specimens; meanwhile, Pill-Bug earns a special affection from Lunna, a high school floozy. Each character is vividly described . . . Meno's passionate new voice makes him a writer to watch." --Publishers Weekly

All of the known writings of John Wilkes Booth are included in this collection. Of this wealth of material, the most important item is a previously unpublished twenty-page manuscript discovered at the Players Club in Manhattan. Written by Booth in 1860 in a form similar to Mark Antony's funeral oration in Julius Caesar, it makes clear that his hatred for Lincoln was formed early and was deeply rooted in his pro-slavery and pro-Southern ideology. Also included in the nearly seventy documents are six love letters to a seventeen-year-old Boston girl, Isabel Sumner, written during the summer of 1864, when Booth was conspiring against Lincoln; several explicit statements of Booth's political convictions; and the diary he kept during his futile twelve-day flight after the assassination. The documents show that Booth, although opinionated and impulsive, was not an isolated madman. Rather, he was a highly successful actor and ladies' man who also was a Confederate agent. Along with many others, he believed that Lincoln was a tyrant whose policies threatened civil liberties. --From publisher's description.

Examines how many free societies have fallen to tyranny and looks at the possibility that the United States could be next.

Few political figures of the twentieth century have aroused as much passion, controversy, and curiosity as Leon Trotsky. His role in history--his epic rise and fall, his fiery persona, his violent end in Mexico in August 1940--holds a fascination that transcends the history of the Russian Revolution. Bertrand M. Patenaude masterfully interweaves the story of Trotsky's final years with flashbacks to pivotal episodes in his career as a young Marxist, revolutionary hero, Red Army chief, Bolshevik leader, outcast from Stalin's USSR, and ultimately heretic of the Kremlin, targeted for assassination by its secret police. Gripping, tragic, and based on extensive firsthand research, Trotsky brilliantly illuminates the fateful and dramatic life of one of history's most captivating and important figures.

Lila Nova is a thirty-two year-old advertising copywriter who lives alone in a plain, white box of an apartment. Recovering from a heartbreaking divorce, Lila's mantra is simple: no pets, no plants, no people, no problems. But when Lila meets David Exley, a ruggedly handsome plant-seller, her lonely life blossoms into something far more colorful. From the cold, harsh streets of Manhattan to the verdant jungles of the Yucatan Peninsula, Hothouse Flower is the story of a woman who must travel beyond the boundaries of sense and comfort to find what she truly wants.
