Oddly, there isn't technically a solenoid built into the mount, rather just a sensor which, when the mount starts to collapse, closes a circuit which then sends a fault code to the engine management computer. There have been a few different part numbers for this mount: 4B3 199 379K. and . 4B3 199 379M (current) - \$230.00

The motor mounts only have a solenoid in them, not a sensor. The faults can be open circuit, short circuit or overload. Now if you don't have any fault, then electrically its OK so this can not have an effect on engine running. But if the mount has leaked, then the mount has less damping effect than it should.
