Reeds Superyacht Manual, published in association with Bluewater Training, is a complete reference and training manual for everyone involved with large yachts, from deck-hands to captains, as well as for leisure boaters and sailors. Covering the course syllabus for all career levels to Officer of the Watch, with explanatory diagrams and photographs, this user-friendly book includes: the key information for all courses required from basic training through Yachtmaster 7 to Officer of the Watch (Yacht) comprehensive coverage of: safety, sea survival, first aid, fire fighting, navigation and radar, seamanship, meteorology, marine radio, general ship knowledge additional information on the career path and marine law, including international and flag state requirements full text of the Collision Regulations; single letter flag and Morse codes. This is the complete on-board reference, whether you are starting out in yachting and looking for the essentials of safety and navigation, or you are seeking a clear understanding of the operation and manning of large yachts and the legislation concerning them.

The Global Maritime distress and Safety System (GMDSS) is becoming the all-embracing term for communication and data transfer between ship and shore, and ship and ship. It's a highly automated system of terrestrial satellite communications technology whose primary role is to maintain safety of life at sea. Within the next five years all vessels over 300 tonnes will be required to carry GMDSS equipment. The seafaring nations of the world have together established the rules and regulations for good working practices within the system, and every serving and future navigating officer will be required to hold the GMDSS General Operator's Certificate. GMDSS for Navigators brings together in one publication the knowledge required by anyone who wants to become a qualified and competent operator of GMDSS communications equipment. It should prove to be the accepted universal reference for GMDSS training.

This book presents the principal structure, networks and applications of the Global Aeronautical Distress and Safety System (GADSS) for enhanced airborne Communication, Navigation and Surveillance (CNS). It shows how their implementation works to ensure better security in flight and on the airports surface: improved aircraft tracking and determination in real space and time; and enhanced distress alerting, safety; and Search and Rescue (SAR) system for missing, hijacked and landed aircraft at sea or on the ground. Main topics of this book are as follows: an overview of radio and satellite systems with retrospective to aeronautical safety; security and distress systems; space segment with all aspects regarding satellite orbits and infrastructures; transmission segment of radio and satellite systems; ground segment of radio and earth ground stations; airborne radio and satellite antenna systems and propagation; aeronautical VHF and HF Radio CNS systems and networks; Inmarsat, Iridium and Cospas-Sasrast aeronautical satellite CNS systems and networks; Aeronautical Global Satellite Augmentation System (GSAS) and networks; Digital Video Broadcasting - Return Channel via Satellite (DVB-RCS) standards and Aeronautical Stratospheric Platform Systems (SPS) and networks.

The Sea Survival Manual is the definitive book on the subject for anyone aboard a yacht of any size. It is aimed at the yachtsman or seafarer who is likely to proceed to sea out of the sight of land, whether for pleasure or professional reasons. Fully compliant with the IMO (International Maritime Organisation) resolutions and MCA (Maritime Coastguard Agency) regulations it embodies Sea Safety checks issued by the MCA and RNLI and is completely international in its appeal. Includes chapters on safety and survival equipment, Global Maritime Distress and Safety Systems (GMDSS), liferafts, grab bags, medical equipment and advice, first aid and emergency treatment, abandoning ship, survival in a liferaft and rescues at sea. This is the first modern book to tackle the subject from the small craft point of view.

Providing high-quality, scholarly research, addressing development, application and implications, in the field of maritime education, maritime safety management, maritime policy sciences, maritime industries, marine environment and energy technology. Contents include electronics, astronomy, mathematics, cartography, command and control, psycho

This fully revised new edition covers the complete radar/ARPA installation and serves as the most comprehensive and up-to-date reference on equipment and techniques for radar observers using older and newer systems alike. Suitable for use as a professional reference or as a training text, the book covers all aspects of radar, ARPA and integrated bridge systems technology (including AIS, ECDIS and GNSS) and their role in shipboard operations. It is a valuable resource for larger vessels and also covers the needs of leisure and amateur sailors for whom this technology is now accessible. Radar and ARPA Manual provides essential information for professional mariners, including those on training courses for electronic navigation systems and professional certificates internationally. Reference is made throughout to IMO (International Maritime Organization) Performance Standards, the role of radar in navigation and in collision avoidance, and to international professional and amateur marine operations qualifications. The most up-to-date book available, with comprehensive treatment of modern radar and ARPA systems and ECDIS (Electronic Chart Display & Information Systems) Full coverage of IMO performance standards relating to radar and navigational technology on new and established vessels Covers best practice use of equipment as well as underlying principles, with essential mathematics and complicated concepts illustrated through the use of clear illustrations

Invaluable to participants of navigation control courses, candidates for Class 2 and Class 1 (master mariner) and all practising navigating officers.

Superyacht Master covers the requirements of the navigation and radar modules for the Officer of the Watch (Yachts) and the Master (Yachts) Certificates required for captains and crew of commercial yachts over 24m and under 3,000 tons. It is the only book written specifically for these modules and will be required reading for all those undertaking a deck career in the superyacht industry or in similar sized commercial craft. This book is intended for the next level of navigators after Yachtmaster and is an extension of the current series of very successful and highly regarded course instruction books available from Adlard Coles Nautical. 'At long last someone has written an in-depth reference manual on radar operation for the masters of large yachts. Every superyacht should have a copy on the bridge!' John Wyborn, Director, The Crew Training Centre, Antibes

This new edition explains the GMDSS rules, regulations and procedures. The book contains the regulations drawn from the International Telecommunication Union (ITU) and it is a useful teaching aid for GMDSS topics thoroughly updated to explain: significant changes in operating procedures to GMDSS, improvements to communication equipment and the new opportunities they provide, including: Automatic Identification Systems (AIS), Inmarsat Fleet services amendments to GMDSS radio maintenance certificate. Also expanded to include sections on use of radio for: piracy and armed robbery attacks at sea, medical advice and assistance, Mede Vac, and contains updated and extended contact details of important organisations relevant to GMDSS.
