The fourth equation is  $x_4 = -5$ , and the other equations do not contain the variable  $x_4$ . The next two steps should be to use the variable  $x_3$  in the third equation to eliminate that variable from the first two equations. In matrix notation, that means to replace  $R_2$  by its sum with 3 times  $R_3$ , and then replace  $R_1$  by its sum with  $-5$  times  $R_3$ . 6.
