Panasonic has today announced the Lumix DMC-FZ28. The new camera is the successor to the popular FZ18 and comes with a slightly increased resolution (10.1 vs 8.0 MP) and all the zoom range you could ever need (27-486mm, 35mm equivalent). However, if that's still not enough there is also an optional 1.7x tele converter available.

This book provides a novel approach to building pathology in current buildings. Drawing on the available literature, hands-on experience and fieldwork inspections, it presents a systematic perspective on the pathology of the building envelope. The book addresses natural stone claddings, adhesive ceramic tiling, renders, painted surfaces, External Thermal Insulation Composite Systems (ETICS), architectural concrete surfaces, windows and doors framing, and claddings for pitched and flat roofs. In addition to highlighting selected materials and construction elements, the book proposes a global classification system for defects and their probable causes, together with in situ diagnosis methods and repair techniques. It also identifies the relationships between defects and causes, diagnosis methods and repair techniques, and the interdependence between different defects, presenting these relations in the form of correlation matrices. Support files with detailed information and an inspection form are also provided. Selected case studies are presented to illustrate the value of a guidance system in fieldwork. Given its scope, the book offers a valuable guide, particularly for researchers, building inspectors, civil engineers, architects and maintenance planners.

Perhaps it is true that God rests, but His presence remains vigorously and constantly astir in everything He has created. Beauty is evidence of that presence. Michael L. Burger has seen this evidence for himself, in stunning detail, and it has reminded him daily of the great beauty and peace in God's love. Ice Flowers are natural phenomena that occur when a deep frost occurs on unfrozen ground when sap and water are drawn from the leaves of plants and frozen into beautiful shapes resembling petals. In the same way, God draws forth our very being and creates something beautiful from it, as a reminder of his imminent presence and eternal love. In this collection of essays and anecdotes Dr. Michael L. Burger has collected moments of true beauty that you can carry on your way. As you walk through winter look for Ice Flowers, and remember that God's love is ever evident in the beauty he has created in and around us.

A local Singaporean magazine dedicated to photography and videography.

Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

One of the most important technologies a photographer can master is shooting and working with raw images. However, figuring out the best way to work with raw files can be confusing and overwhelming. What's the advantage to working in raw? How do you manage, organize, and store raw files? What's the best way to process your files to meet your photographic needs? How do Photoshop, Lightroom and Adobe Camera Raw work together? Is it possible to keep your photos in the raw format and still enhance them extensively? Philip Andrews answers these questions and more in his all-new essential raw workflow guide. Whether you are a beginner just starting to explore the intricacies of shooting raw, or a seasoned pro looking for a better workflow, this book provides all of the information you need to know to create stunning images from your raw files. As well as covering the most popular raw software packages such as Adobe Camera Raw and Lightroom, it provides general information that you will find useful no matter which software you prefer. Clear, precise step-by-step instructions will help you get from start to finish with essential tips and tricks along the way. Packed with inspirational images and clearly marked screenshots pointing out the exact information you need, you'll be on your way to creating a better, faster, and more efficient raw workflow in no time.

Excerpt: The Panasonic Lumix DMC-GH1 is a digital mirrorless interchangeable lens camera adhering to the Olympus and Panasonic developed Micro Four Thirds System (MFT) system design standard. Panasonic classified the GH1 as a hybrid stills/video camera and the GH1 was introduced and marketed as a higher end camera than Panasonic's first MFT camera, the stills only, non-video capable Lumix DMC-G1. The Panasonic Lumix DMC-GH1 was the second MFT camera introduced under the MFT design standard and the first MFT camera to include HD video recording capability. The GH1 was announced at the April 2009 Photo Marketing Association Annual Convention and Trade Show. As part of the marketing of this camera, Panasonic sponsored some professional filmmakers by allowing them to borrow the GH1 camera for their projects. One such GH1 model camera was used to film the pilot of the Swedish horror film Marianne. When announced in March 2009, the Panasonic Lumix DMC-GH1 was marketed as a new class of "Creative HD Hybrid" camera, and as Panasonic's...
