One of a series for young and adult readers that introduce the specialised language of a particular topic. The volumes use large, detailed full-colour photographs with numerous captions. Some additional explanatory text is also included, as well as a comprehensive index of the 3000-word specialist vocabulary. This volume presents the language of buildings, including castles, cathedrals, homes and skyscrapers. First published in the UK by Dorling Kindersley (1992).

Discusses the features associated with various types of American homes

Contains definitions of terms used for buildings, parts of buildings, the development of historic structures, technical standards, and preservation practice

With more than 20,000 words and terms individually defined, the Dictionary offers huge coverage for anyone studying or working in architecture, construction or any of the built environment fields. The innovative and detailed cross-referencing system allows readers to track down elusive definitions from general subject headings. Starting from only the vaguest idea of the word required, a reader can quickly track down precisely the term they are looking for. The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning. Davies and Jokiniemi's work sets a new standard for reference books for all those interested in the buildings that surround us. To browse the book and to see how this title is an invaluable resource for both students and professionals alike, visit www.architectsdictionary.com.

Describes the fascinating art and technique of how things are built, from the humblest mud hut to the highest skyscraper.

Text, exploded view photographs, and labels reveal everyday objects and their parts, including the telephone, camera, and bicycle.

This innovative and unique book is a visual guide to the buildings that surround us, naming all the visible architectural features so that, unlike other architectural dictionaries, the reader doesn't have to know the name before looking it up. Clear line drawings and extensive colour photographs illustrate each of the main building types, from forts to churches, stately homes to skyscrapers. The individual structural elements and materials common to all buildings are then explained, whether in Classical, Gothic or Modernist style, before delving into the inner architectural details such as doors and windows, roofs and staircases. A comprehensive glossary completes the book. An original and accessible take on the architectural dictionary, this book takes you on a visual tour of the buildings around us, and will be useful not only to students but to anyone with a general interest in architecture.
